

Synthesis Properties And Devices Lecture Notes In Nanoscale Science And

About the Book

This book is a comprehensive to the synthesis, properties, and applications of nanoscale materials. It is written by a team of experts in the field and provides a detailed overview of the latest research and developments in nanoscience.

Core/Shell Quantum Dots: Synthesis, Properties and Devices (Lecture Notes in Nanoscale Science and Technology Book 28) by Christopher G. Small

★★★★☆ 4.5 out of 5

Language	: English
File size	: 60210 KB
Text-to-Speech	: Enabled
Screen Reader	: Supported
Enhanced typesetting	: Enabled
Print length	: 612 pages
Hardcover	: 512 pages
Paperback	: 393 pages
Item Weight	: 2.16 pounds
Dimensions	: 6.69 x 1.13 x 9.61 inches
Reading age	: 22 years and up
X-Ray for textbooks	: Enabled

The book is divided into three parts. The first part covers the synthesis of nanoscale materials, including both top-down and bottom-up approaches. The second part discusses the properties of nanoscale materials, including

their optical, electrical, and magnetic properties. The third part explores the applications of nanoscale materials in a variety of fields, including electronics, energy, and medicine.

Synthesis Properties And Devices Lecture Notes In Nanoscale Science And is a valuable resource for students, researchers, and professionals working in the field of nanoscience.

Key Features

- Comprehensive coverage of the synthesis, properties, and applications of nanoscale materials
- Written by a team of experts in the field
- Provides a detailed overview of the latest research and developments in nanoscience
- Well-illustrated with figures and tables
- Includes a glossary of terms

Table of Contents

1. to Nanoscale Science
2. Synthesis of Nanoscale Materials
3. Properties of Nanoscale Materials
4. Applications of Nanoscale Materials
5. Glossary of Terms

Author Biographies

Dr. John Smith is a professor of nanoscience at the University of California, Berkeley. He is a leading expert in the synthesis and characterization of nanoscale materials. He has published over 100 papers in peer-reviewed journals and is the author of several books on nanoscience.

Dr. Jane Doe is a research scientist at the National Institute of Standards and Technology. She is a leading expert in the development of nanoscale devices. She has published over 50 papers in peer-reviewed journals and is the holder of several patents on nanoscale devices.
