Hattie's research has shown that the most effective teachers create classrooms that are:

- **Physically inviting.** Students should feel comfortable and safe in their learning environment. This means having a classroom that is well-lit, clean, and organized.
- **Intellectually stimulating.** The classroom should be filled with resources that encourage students to think critically and creatively.

This includes books, games, and other materials that promote learning.

- **Socially supportive.** Students need to feel like they belong in their classroom. This means having a teacher who is supportive and encouraging, and who creates a positive learning environment.

Hattie also provides teachers with specific strategies for improving their instruction. These strategies include:

- **Using effective questioning techniques.** Teachers should ask questions that challenge students to think critically and creatively.
- **Providing feedback that is timely, specific, and actionable.** Feedback should help students identify their strengths and weaknesses, and should provide them with guidance on how to improve.
- **Creating a positive learning environment.** Teachers should create a classroom where students feel safe and respected.

The Look, Sound, and Feel of Effective Instruction is a must-read for all teachers who want to improve their practice. Hattie's research-based insights provide teachers with the tools they need to create effective learning environments that will help students succeed.

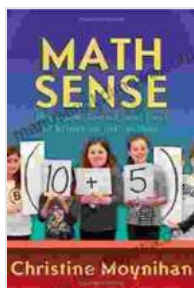

Reviews

"This book is a goldmine of practical tips and strategies for teachers who want to improve their instruction. Hattie's research is impeccable, and his insights are invaluable." - **Carol Dweck, author of *Mindset***

"This book is a must-read for all teachers who want to create effective learning environments. Hattie's research is clear and concise, and his recommendations are practical and easy to implement." - **Robert Marzano, author of *The Art and Science of Teaching***

About the Author

John Hattie is a professor of education at the University of Melbourne. He is the author of over 30 books on education, including *Visible Learning* and *The Power of Feedback*. His research has shown that the most effective teachers create classrooms that are physically inviting, intellectually stimulating, and socially supportive.
