

Year Shape Intermediate Numberfit: The Ultimate Math Manipulative for Building Number Sense

Year 1 - Shape - Intermediate - Numberfit by Chris McMullen

★★★★☆ 4.5 out of 5

Language : English

Paperback : 600 pages

Item Weight : 2.33 pounds

Dimensions : 6.69 x 1.35 x 9.61 inches

File size : 4344 KB

Screen Reader : Supported

Print length : 300 pages

X-Ray for textbooks: Enabled

Year Shape Intermediate Numberfit is a groundbreaking math manipulative that helps students develop a deep understanding of numbers and operations. This innovative tool is perfect for students in grades 3-5 who are struggling with math or who need extra support. With Year Shape Intermediate Numberfit, students can visualize and manipulate numbers in a way that makes math concepts come to life.

How Year Shape Intermediate Numberfit Works

Year Shape Intermediate Numberfit is a set of 100 double-sided tiles. Each tile represents a different number from 0 to 99. The tiles are color-coded according to their place value: red for ones, blue for tens, and green for hundreds.

Students can use the tiles to represent numbers in a variety of ways. They can build towers to represent numbers, they can line up tiles to compare numbers, and they can use the tiles to solve math problems.

Benefits of Year Shape Intermediate Numberfit

Year Shape Intermediate Numberfit has a number of benefits for students, including:

- Helps students develop a deep understanding of numbers and operations
- Makes math concepts more concrete and easier to understand
- Improves students' problem-solving skills
- Increases students' confidence in math
- Is fun and engaging to use

How to Use Year Shape Intermediate Numberfit

Year Shape Intermediate Numberfit can be used in a variety of ways to teach math concepts. Here are a few ideas:

- **Build towers to represent numbers.** This is a great way for students to learn about place value. Students can build towers to represent different numbers, and then compare the towers to see which number is greater.
- **Line up tiles to compare numbers.** This is a great way for students to learn about comparing numbers. Students can line up tiles to compare two numbers, and then use the tiles to determine which number is greater.

- **Use the tiles to solve math problems.** Year Shape Intermediate Numberfit can be used to solve a variety of math problems, such as addition, subtraction, multiplication, and division. Students can use the tiles to represent the numbers in the problem, and then use the tiles to solve the problem.

Year Shape Intermediate Numberfit is a valuable tool for any math classroom. It is a fun and engaging way to help students develop a deep understanding of numbers and operations.

If you are looking for a way to improve your students' math skills, Year Shape Intermediate Numberfit is the perfect solution.
